

## **Aero Sekur – flying high at Farnborough**

Aero Sekur, the specialist manufacturer of safety systems and advanced flexible structures for the aerospace and defence markets which has a forty year history, made a major impact at its inaugural display at Farnborough International Airshow 2008.

The company formed the Aero Sekur Shooting Stars all female sky diving team and they made their first appearance at the airshow with exciting aerial aerobatics combined with smoke displays.

An impressive 50 sq m exhibition stand featured a display of a SPacecrew Emergency Module (SPEM) which is under development by Aero Sekur and an eye catching parachute canopy illustrated the company's capability in 'chutes' for defence and aerospace applications.

Aero Sekur also ensured that its young engineers had a high profile at Farnborough International Airshow. In line with the youth theme for the Friday of the airshow, four of Aero Sekur's employees in their late 20s/early 30s manned the company's stand. Aero Sekur believes strongly in giving newly qualified engineers real responsibility with development paths that allow them to actively contribute to innovations in the aerospace and defence sectors.
